Gurukul Public School

Beautiful masks on beautiful faces

Masks made by students with waste materials. They didn't use costly stationary like fine papers, charts, glitter and other items to make and decorate the masks; they simply used the material which was easily available in home. As we can see, they did well with limited resources. The masks show the creativity of our students. Our school believes in giving students every opportunity to develop their creativity. Creativity is an essential part of studies at Gurukul. Such creative tasks also help to groom the personalities of the children.

Regular, studious, disciplined student Antara Singh of Class 7 has impressed everyone with her dedication. She comes to learn Taekwondo early in the morning and when the school begins, she applies that discipline and concentration to her studies. For her excellent all-round performance, Antara is our Student of the Week.

THIS WEEK WE HAD TWO PARENTS-TEACHER MEETINGS:

The first PTM was held for classes Nursery to 1. This PTM was especially held to explain to parents that though their kids may be small, it is important that the children study properly for the exams and the parents should make sure that they do so. From 2nd March onwards, final exams for these classes are to begin.

The second PTM was held for students who have reached Class 10 and will be appearing in Board exams next year. The importance of Board exams was explained to parents and they were asked to make sure that their children pay more attention to their studies in this crucial year of their education. The school principal and the academic coordinator attended this meeting to personally interact with the parents and to explain to them that the academic session for Board exam students will start a month early to help them better prepare for the exams.
